Profile

Computer Science and Engineering student specializing in Artificial Intelligence at Parul University, graduating in 2027, and SAP Certified – SAP Generative AI Developer. Practical experience across machine learning, Python web applications, and Generative AI through internships and projects. Familiar with C++, C, Python, DSA, OOP fundamentals, debugging, and software testing; interested in reliable software and AI-powered applications.

Education

Parul University **2023 – 2027**
B.Tech (Bachelor of Technology) in Computer Science Engineering, Artificial Intelligence Specialization *6.68/10 CGPA*

Professional Experience

Machine Learning Intern **June 2025 – July 2025**
IBM SkillsBuild and Edunet Foundation *Remote*

- Created an Employee Salary Prediction model using Python and Scikit-learn with a Random Forest algorithm.
- Prepared and preprocessed datasets, applying feature engineering to support model training.
- Tuned model hyperparameters and evaluated prediction outputs to review model performance.

Python Intern **May 2025 – June 2025**
APSSDC *Remote*

- Implemented a Marks Calculator web application using Python, Flask, and HTML to calculate results from user inputs.
- Wrote application logic to process marks and display calculated results through a web interface.
- Tested result correctness and debugged calculation and input-handling issues to improve reliability.

Generative AI Intern **August 2024**
Prodigy InfoTech *Remote*

- Studied foundational Generative AI concepts and practical AI-assisted workflows for content generation and problem-solving.
- Applied AI tools to explore prompt-based task workflows and reviewed generated outputs for relevance.
- Assessed generated responses and refined task instructions to better align outputs with the intended requirements.

Projects

SAP Certified – SAP Generative AI Developer
AI-Based Customer Feedback Analysis and Issue Prioritization System

- Crafted prompts to analyze customer sentiment, categorize issues, and extract order and product references into structured JSON.
- Expanded the workflow to detect multiple issues in one feedback entry, propose actionable resolution points, and assign priorities.
- Evaluated outputs from Gemini 2.5 Flash Lite, GPT-4.1 nano, and GPT-5-Mini for the customer feedback analysis task.

Verify Credly

Mana Cinema — Telugu Movie Recommendation Application

- Created a content-based Telugu movie recommendation application using genres, overviews, directors, and cast details.
- Used TF-IDF vectorization and cosine similarity with a curated dataset and Flask interface to suggest movies with similar content.
- Connected movie metadata to the recommendation flow so users could select a title and view related Telugu films.

Personal Portfolio Website — Development & Deployment

- Structured project, skills, internship, certification, and AWS evidence sections to present technical work.
- Set up GitHub Pages deployment and a custom domain, including repository settings and DNS configuration.
- Organized navigation and project links to make portfolio content and technical evidence easy to access.

Technical Skills

Programming:	C++, C, Python
Core Concepts:	Programming Fundamentals, Object-Oriented Programming (OOP), DSA, Problem-Solving
AI / Generative AI:	Machine Learning, Generative AI, Prompt Engineering
Databases/Cloud:	SQL Fundamentals, AWS Cloud Fundamentals
Technical Skills:	Troubleshooting, Debugging, Software Testing, Input Validation, Documentation
Development:	Flask, HTML, CSS
Tools:	Git, GitHub, VS Code
Professional Skills:	Analytical Thinking, Communication, Team Collaboration, Attention to Detail, Time Management

Achievements & Certifications

- Solved 100+ coding problems on LeetCode and other platforms, practicing arrays, strings, linked lists, searching, sorting, and logical problem-solving.
- Recipient of the Yuva Unstoppable Scholarship.
- Completed cloud and AI learning activities, including AWS learning modules and Machine Learning project work.
- Used Git and GitHub for project organization.
