

DERANGULA SIVA KUMAR

Computer Science Student — Associate Product Engineer

📍 Rayachoty, Andhra Pradesh — 📞 +91 9966157781 — ✉️ sivakumar986@outlook.com

🌐 [linkedin.com/in/sivakumar986](https://www.linkedin.com/in/sivakumar986) — 🐙 github.com/sivakumar9867

Profile

- Computer Science Engineering student with working knowledge of C++, C, Python, SQL, Data Structures and Algorithms, and Object-Oriented Programming.
- Comfortable with programming fundamentals, debugging, testing, and basic software development concepts. Hands-on experience building Python applications and Machine Learning projects. Interested in improving problem-solving and algorithmic skills and contributing to software development projects.

Education

Parul University

B.Tech in Computer Science Engineering (Artificial Intelligence Specialization)

2023 – 2027

6.68/10 CGPA

Professional Experience

Machine Learning Intern

IBM SkillsBuild and Edunet Foundation

06/2025 – 07/2025

Remote

- Built an employee salary prediction model using Python and Scikit-learn, applying data preprocessing, feature engineering, and Random Forest.
- Refined datasets for model training through preprocessing and feature engineering.
- Trained a Random Forest model, tuned hyperparameters, and evaluated model performance.

Python Intern

APSSDC

05/2025 – 06/2025

Remote

- Developed a Marks Calculator web application using Python, Flask, and HTML for automated result calculation based on user inputs.
- Implemented application logic for processing marks and generating calculated results through a web interface.
- Tested and debugged application functionality to improve correctness and reliability.

Generative AI Intern

Prodigy InfoTech

08/2024

Remote

- Explored fundamental concepts and practical applications of Generative AI using AI-based tools and workflows.
- Applied foundational Generative AI techniques for AI-assisted content generation and problem-solving.

Projects

Movie Recommendation System

- Created a movie recommendation system using Python and Machine Learning techniques.
- Organized movie data through preprocessing and feature engineering and defined recommendation logic based on user preferences and movie characteristics.

AI-Based Agri-Flow Intelligence — Team Project

- Contributed to the cost and profitability analysis module for agricultural production.
- Implemented calculations for production costs, revenue, Net Farm Income, and Benefit-Cost Ratio, with sensitivity analysis of key cost variables.

Technical Skills

Languages:

C++, C, Python, SQL

DSA:

Data Structures, Algorithms, Problem Solving, Searching, Sorting

Core:

Object-Oriented Programming

Software Engineering:

Programming, Debugging, Testing, Code Optimization

Development:

Flask, HTML

AI / ML:

Machine Learning, Scikit-learn, Data Preprocessing, Feature Engineering

Tools:

Git, GitHub, VS Code

Achievements & Activities

- Solved 100+ coding problems on LeetCode and other coding platforms, covering arrays, strings, linked lists, searching, sorting, and algorithms.
- Recipient of the Yuva Unstoppable Scholarship.
