Question No : 1 / 1

As an AWS Cloud Engineer, your task is to implement real-time data change capture for a DynamoDB table in the Ohio region. This involves creating a DynamoDB table named "book" with specific keys and enabling streams on the table. Task Details:

- **Create the DynamoDB Table:**
 - Navigate to the DynamoDB service in the AWS Management Console.
 - Choose "Create table".
 - Set the table name to "book".
 - Set the partition key to "author".
 - Set the sort key to "bookName".
 - Enable streams on the table with the "New image" option.
 - Click "Create" to launch the DynamoDB table.

Specifications:

- **Table Name:** book
- **Partition Key:** author
- **Sort Key:** bookName
- **Region:** us-east-2(Ohio)
- **Streams:** Enabled with "New image"
