Question No : 1 / 1

As a Cloud Architect, you are tasked with setting up a private DNS infrastructure for your organization's development and testing environments using AWS Route 53. You need to create a private hosted zone for the domain "dev-test.com" and add a DNS A record within this hosted zone to manage internal domain name resolution.

Task Details

- Create a Private Hosted Zone:
 - The hosted zone name should be "dev-test.com".
 - Ensure the hosted zone is private, meaning it will only be accessible from within your specified VPCs.
- Create a DNS Record:
 - Within the "dev-test.com" private hosted zone, create a DNS record with the name "testing".
 - The DNS record type should be "A".

Specifications:

- Hosted Zone Name: dev-test.com
- Hosted Zone Type: Private
- DNS Record Name: testing

To start the test, Click the below AWS account link. Copy and Paste the given User Name and Password.
