Profile

Motivated B.Tech (Bachelor of Technology) student in Computer Science Engineering (Artificial Intelligence) at Parul University, graduating in 2027. Analytical and logical problem-solver with internship experience in Python, Machine Learning, data preprocessing, model evaluation, application testing, and debugging. Familiar with C/C++, Object-Oriented Programming (OOP), GitHub, and version control. Interested in learning SAP ERP technologies and developing skills in enterprise application development.

Education

Parul University **2023 – 2027**
B.Tech (Bachelor of Technology) in Computer Science Engineering, Artificial Intelligence Specialization *6.68/10 CGPA*

Professional Experience

Machine Learning Intern **June 2025 – July 2025**
IBM SkillsBuild and Edunet Foundation *Remote*

- Built an Employee Salary Prediction model using Python and Scikit-learn, applying data preprocessing, feature engineering, and a Random Forest algorithm.
- Prepared and validated datasets, tuned model hyperparameters, and evaluated prediction performance.

Python Intern **May 2025 – June 2025**
APSSDC *Remote*

- Developed a Marks Calculator web application using Python, Flask, and HTML to automate result calculations from user inputs.
- Implemented application logic, tested result correctness, and debugged issues to improve reliability.

Generative AI Intern **August 2024**
Prodigy InfoTech *Remote*

- Explored foundational Generative AI concepts and AI-assisted workflows for content generation and problem-solving.
- Reviewed generated outputs and used AI tools as support for learning and task exploration.

Projects

Employee Salary Prediction *Python, Pandas, Scikit-learn, Machine Learning*

- Developed an employee salary prediction model during the IBM SkillsBuild and Edunet Foundation Machine Learning internship.
- Prepared and preprocessed data and applied feature engineering to support model training.
- Trained a Random Forest model using Scikit-learn to generate salary predictions from the available dataset.
- Evaluated prediction performance and reviewed model outputs as part of the machine-learning workflow.

Movie Recommendation System *Python, Machine Learning*

- Preprocessed movie data and implemented recommendation logic based on movie characteristics and user preferences.
- Organized relevant movie attributes into usable features to support the recommendation process.
- Reviewed recommendation outputs against input preferences and refined the logic during project testing.
- Organized the workflow from data preparation to recommendation output to make the process easier to maintain.

AI-Based Agri-Flow Intelligence — Team Project

- Contributed to a Python-based agricultural cost and profitability analysis system using production costs, Net Farm Income, Benefit-Cost Ratio, and break-even metrics.
- Integrated MSP, mandi-price, and government-subsidy inputs to support crop-level financial comparisons.
- Applied $\pm 20\%$ sensitivity analysis and developed sustainability-based recommendations with financial visualizations.
- Compared financial indicators across crop scenarios to help communicate profitability and break-even considerations.

Technical Skills

Programming:	C, C++, Python; SQL fundamentals
Core Concepts:	Object-Oriented Programming (OOP) fundamentals, Data Structures and Algorithms, Problem Solving, Logical Thinking
Software Practices:	Debugging, Testing, Input Validation, Documentation, Analytical Thinking, Team Collaboration
Development:	Flask, HTML
Tools:	Git, GitHub, Version Control, VS Code, Scikit-learn, AWS fundamentals
Professional Development:	Interested in learning SAP ERP technologies and developing skills in enterprise application development.

Achievements & Certifications

- Solved 100+ coding problems on LeetCode and other platforms, practicing arrays, strings, linked lists, searching, sorting, and logical problem-solving.
- Recipient of the Yuva Unstoppable Scholarship.
- Completed cloud and AI learning activities, including AWS learning modules and Machine Learning project work.
- Used Git and GitHub for source-code management, version control, and project organization.
